

26 AUG 2016

Angelina College
Technology and Workforce Division
ELPT 1445 Commercial Wiring
General Syllabus

I. BASIC COURSE INFORMATION:

A. Course Description:

Four hours credit. Commercial wiring methods. Includes overcurrent protection, raceway panel board installation, proper grounding techniques, and associated safety procedures. Students will be able to interpret electrical blueprints/drawings; compute the circuit sizes and overcurrent protection needed for the installation of branch circuits, feeders, and service entrance conductors; explain the proper installation of wiring devices according to the National Electrical Code (NEC) and local electrical codes; demonstrate grounding methods; identify commercial wiring methods including conduit bending; and demonstrate proper safety procedures. Corequisite: TECM 1301. Three lecture and two lab hours each week. Lab fee.

B. Intended Audience:

Intermediate

C. Instructor: David Turbeville

Office Location: TW-111

Office Hours: TBA

Phone: 936 633 5246 (front office)

E-mail Address: dturbeville@angelina.edu

II. INTENDED STUDENT OUTCOMES:

A. Core Objectives Required for this Course

- 1. Critical Thinking:** to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
- 2. Communication:** to include effective development, interpretation and expression of ideas through written, oral and visual communication.
- 3. Empirical and Quantitative Skills:** to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions

B. Course Learning Outcomes for all Sections

1. interpret electrical blueprints/drawings
2. Compute the circuit sizes and overcurrent protection needed for the installation of branch circuits, feeders, and service entrance conductors
3. Explain the proper installation of wiring devices according to the National Electrical Code (NEC) and local electrical codes
4. Demonstrate grounding methods
5. Identify commercial wiring methods including conduit bending
6. Demonstrate proper safety procedures

III. ASSESSMENT MEASURES

A. Assessments for the Core Objectives:

- 1. Critical Thinking:** Students will complete a commercial wiring project requiring students to understand electrical requirements, interpret relevant electrical codes, develop a plan and complete installation. A standard rubric is used to assess this objective.

2. **Communication:** Students are required to develop a presentation to discuss their wiring plan, budget and project schedule. A standard rubric is used to assess this objective.
3. **Empirical and Quantitative Skills:** Students will solve conductor and over-current device sizing problems, as well as develop budgeting and scheduling spreadsheets. A standard rubric is used to assess this objective.

B. Assessments for Course Learning Outcomes

1. Students will compute the circuit sizes needed for the installation of branch circuits, feeders, and service entrance conductors for various commercial settings. Performance is assessed for accuracy using a checklist.
2. Students will demonstrate ability to properly install wiring devices according to electrical codes, using standard electrical components. Performance is assessed for compliance, safety and correct function using a checklist.
3. Students will demonstrate grounding methods. Performance is assessed for compliance, safety and correct function using a checklist.
4. Students will install ground fault circuits. Performance is assessed for compliance, safety and correct function using a checklist.
5. Students will identify residential wiring methods by planning and installing electrical circuits in various residential settings. Performance is assessed for compliance, safety and correct operation using a checklist.
6. Students will demonstrate proper safety procedures at all times during their lab work. Performance is assessed for compliance with OSHA and NEC guidelines using a checklist.

IV. INSTRUCTIONAL PROCEDURES:

This course is being delivered in a hybrid format. This means is that some instruction or activities are delivered outside of the classroom. Content delivered outside of the classroom may include, video, audio, images and links to external websites. Students are encouraged to consult with their instructor if additional instruction is needed.

Lab activities are required in this course. Attendance during the on-campus part of a hybrid course is mandatory. Completion of in-class work is also mandatory.

V. COURSE REQUIREMENTS AND POLICIES:

A. Required Textbooks and Recommended Readings, Materials and Equipment

Textbook: Mullin, Ray. Electrical Wiring Commercial. New York Thomson Delmar Learning.
2014 Edition of The National Electrical Code.

Equipment:

1. ANSI Z87.1 Clear Safety Glasses
2. Precision Electrical Screwdriver Set (Harbor Freight # 96075)
3. Insulated Wire Cutter/Stripper (Harbor Freight #98410)
4. Diagonal Cutting Pliers Klein D228-7
5. 9 in 1 Screwdriver Hilmer model 1839053 or equivalent
6. Meter should be one of the following: Klein CL3200, Fluke 323 or Southwire 21050T)
7. Non-Contact Voltage Detector Fluke-1AC-A1-II
8. Texas Instrument TI-30X IIS Scientific Calculator

B. Course Policies – This course conforms to the policies of Angelina College as stated in the Angelina College Handbook.

1. **Academic Assistance** – If you have a disability (as cited in Section 504 of the Rehabilitation Act of 1973 or Title II of the Americans with Disabilities Act of 1990) that may affect your participation in this class, you should see Steve Hudman (936 633-5293) shudman@angelina.edu in the Student Center. At a post-secondary institution, you must self-identify as a person with a disability; Mr. Hudman will assist you with the necessary information to do so.

2. **Attendance** – Attendance is required as per Angelina College Policy and will be recorded every day. Any student with three (3) consecutive absences or four (4) cumulative absences may be dropped from the class. Records will be turned in to the academic dean at the end of the semester. Do not assume that non-attendance in class will always result in an instructor drop. **You must officially drop a class or risk receiving an F.** This is official Angelina College Policy.

3. **Additional Policies Established by the Instructor**
 - Because safety is valued in the workplace, if you choose to ignore the safety guidelines of the class, I must drop you from class. Please adhere to our safety guidelines.
 - Handling conductors energized above 48V is not allowed.
 - Use only insulated tools while working around electrical equipment. Do not use knives or multi-tools in place of appropriate tools.
 - Food is not allowed in class or lab. Drinks with a lid are allowable in the classroom but not in the lab areas. Liquids create a slip and shock hazard. Spills must be cleaned up by the person who spills the drink.
 - I want you to succeed in this and all classes. Cell phones can be distracting, and should be set to vibrate. Texting and social media have become part of our daily lives, and are now a habit for many people. Like any habit, it will easily distract you from class. Please limit yourself to essential use of the phone. It is a powerful tool for looking up information. Step out of class if you have to take a call.
 - I use a sign-out sheet to document attendance. It is available at approximately 20 minutes prior to the end of class.
 - There will be a daily quiz or demonstration of skills. It will take place at the end of class. Our goal is your success in class, but also upon graduation. We want you to be able to demonstrate confidence and ability upon leaving the class.
 - If a team project is assigned, each student must demonstrate ability to construct, operate or modify the project.
 - All communication concerning assignments are sent to your Angelina College student email address.
 - Students should be ready to make a short (3 minute) presentation on a class topic at any time. I will randomly select one or more students from the sign-in sheet each class period.

VI. COURSE OUTLINE: Description of the Course Activities including due dates, schedules, and deadlines.

At a minimum, there will be a midterm exam consisting of a written exam as well as a demonstration of skills. In addition, there will be a final exam which also consists of a written exam and a demonstration of skills. Additional assignments and quizzes will be delivered through Blackboard during the course of the semester.

VII. EVALUATION AND GRADING:

All exams and assignments are delivered through Blackboard. Each exam and assignment is assigned a point value. Your score for the class is based on the percentage of points achieved. Extra points are not available. Attendance is not counted as a score.

Above 89.5%	A
between 79.5 and 89.5%	B
between 69.5 and 79.5%	C
between 59.5 to 69.5%	D
Below 59.5%	F

- A. The instructor may modify the provisions of the syllabus to meet individual class needs by informing the class in advance as to the changes being made.
- B. As a student enrolled in a Technology & Workforce program, you will encounter certain risks while you are in a classroom, laboratory experience, or in a clinical or practicum setting. In the event that you sustain an injury and/or require any medical testing or care, all resulting medical expenses (hospital, ambulance, or physician fees), are your financial responsibility and not the responsibility of Angelina College or the clinical/practicum site.
- C. Effective August 27, 2012 Angelina College prohibits the use of tobacco products on campus, except in your personal vehicle. This measure was approved by the College Board of Trustees, and includes smoking and smokeless tobacco products.
