

**Angelina College**  
**Division of Science and Mathematics**  
**MATH 1324 Internet**  
**Mathematics for Business & Social Sciences**  
**Instructional Syllabus**

**Fall 2017**

**I. BASIC COURSE INFORMATION:**

- A. Mathematics for Business & Social Sciences. The application of common algebraic functions, including polynomial exponential, logarithmic, and rational, to problems in business, economics, and the social sciences are addressed. The applications include mathematics of finance, including simple and compound interest and annuities; systems of linear equations; matrices; linear programming; and probability, including expected value. Prerequisite: Meet TSI college-readiness standard for Mathematics; or equivalent. Students are required to have a graphing calculator. Three lecture hours each week.
- B. The intended audience includes students majoring in business, management, economics, or the life or social sciences.

- C. Instructor: **George Reed**  
 Office Location: **S- 211**  
 Office Hours: **→→→**  
 Phone: **(936) 633-5485**  
 E-mail Address: **greed@angelina.edu**

Day	Office Hours
Monday	<b>1:30-4:00</b>
Tuesday	<b>8:00-9:30; 1:30-4:00</b>
Wednesday	<b>1:30-3:00</b>
Thursday	<b>8:00-9:30; 1:30-3:00</b>
Friday	<b>By Appointment</b>

**II. INTENDED STUDENT OUTCOMES:**

- A. Core Objectives Required for this Course** (Only the core objectives to be assessed are listed.)

- 1. Critical Thinking:** to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information
- 2. Communication:** to include effective development, interpretation and expression of ideas through written, oral and visual communication
- 3. Empirical and Quantitative Skills:** to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions

**B. Course Learning Outcomes for all Sections**

1. Apply elementary functions, including linear, quadratic, polynomial, rational, logarithmic, and exponential functions to solving real-world problems.
2. Solve mathematics of finance problems, including the computation of interest, annuities, and amortization of loans.
3. Apply basic matrix operations, including the linear programming methods, to solve application problems.
4. Demonstrate fundamental probability techniques and application of those techniques, including expected value, to solve problems.
5. Apply matrix skills and probability analyses to model applications to solve real-world problems.

### III. ASSESSMENT MEASURES

#### A. Assessments for the Core Objectives

[As required, each core objective shall be assessed using a standardized rubric.] [The judgment of how the objectives were met will be in accordance to the pre-designated “developing” level of attainment for this course. In the paragraphs below, an assignment may be an essay, matching or multiple choice questions.]

1. **Critical thinking:** Responses to an assignment will be assessed to determine the level of pertinent knowledge of each student with respect to the critical thinking objective.
2. **Communication:** Students will be instructed in the proper written format and organization of different types of mathematical applications. Students will be instructed how to format and organize visual information (i.e., graphs, tables, etc.). Responses to an assignment will be assessed to determine the level of pertinent knowledge of each student with respect to the communication objective.
3. **Empirical and Quantitative Skills (EQS)** - Students will be instructed on using empirical and quantitative skills and “critical thinking” to draw conclusions from their communications as they apply to real world applications. Responses to an assignment will be assessed to determine the level of pertinent knowledge of each student with respect to this objective.

#### B. Assessments for Course Learning Outcomes

1. The Course Learning Outcomes for all Sections of para. II. B. are listed below along with how each shall be assessed:

1. *Outcome: **Apply elementary functions, including linear, quadratic, polynomial, rational, logarithmic, and exponential functions to solving real-world problems.*** This Learning Outcome will be assessed via embedded test questions (such as essay, matching or multiple choice questions) to determine the level of pertinent knowledge of each student with respect to these outcomes. A course-specific standardized rubric shall be used.
2. *Outcome: **Solve mathematics of finance problems, including the computation of interest, annuities, and amortization of loans.*** This Learning Outcome will be assessed via embedded test questions (such as essay, matching or multiple choice questions) to determine the level of pertinent knowledge of each student with respect to these outcomes. A course-specific standardized rubric shall be used.
3. *Outcome: **Apply basic matrix operations, including the linear programming methods, to solve application problems.*** This Learning Outcome will be assessed via embedded test questions (such as essay, matching or multiple choice questions) to determine the level of pertinent knowledge of each student with respect to these outcomes. A course-specific standardized rubric shall be used.
4. *Outcome: **Demonstrate fundamental probability techniques and application of those techniques, including expected value, to solve problems.*** This Learning Outcome will be assessed via embedded test questions (such as essay, matching or multiple choice questions) to determine the level of pertinent knowledge of each student with respect to these outcomes. A course-specific standardized rubric shall be used.
5. *Outcome: **Apply matrix skills and probability analyses to model applications to solve real-world problems.*** This Learning Outcome will be assessed via embedded test questions (such as essay, matching or multiple choice questions) to determine the level of pertinent knowledge of each student with respect to these outcomes. A course-specific standardized rubric shall be used.

#### **IV. INSTRUCTIONAL PROCEDURES:**

The course is taught using a combination of lectures, discussions, and practice exercises. The amount of time spent using any one technique will vary from class to class and from lesson to lesson as determined to be most appropriate by the instructor.

#### **V. COURSE REQUIREMENTS AND POLICIES:**

##### **A. Required Textbooks, Materials and Equipment –**

1. Required Textbook: Mathematics with Applications In the Management, Natural, and Social Sciences, or Finite Mathematics with Applications 11<sup>th</sup> ed., Lial, Hungerford, Holcomb, Mullins; Pearson publisher. An electronic copy is acceptable. Ref. 2. below.
2. Access to [www.angelina.mylabsplus.com](http://www.angelina.mylabsplus.com) is required. The access code is included with a new book bought at AC bookstore or the code may be purchased separately. An electronic copy of the text is provided as part of the MyLabsPlus access.
3. Specific equipment required of all students: A graphing calculator with matrix and “finance-TVM Solver” applications **is required**. The calculator must be able run TI software. Classroom demonstrations and instruction will support the use of calculator models TI-83+ or model TI-84; hence, one of these models is highly recommended.
4. Additional text(s) and supplementary materials for the individual instructor: See instructor.
5. Specific equipment required by the individual instructor: Cartesian-coordinate Graph Paper, straight edge.

##### **B. Course Policies – This course conforms to the policies of Angelina College as stated in the Angelina College Handbook.**

1. **Academic Assistance** –If you have a disability (as cited in Section 504 of the Rehabilitation Act of 1973 or Title II of the Americans with Disabilities Act of 1990) that may affect your participation in this class, you should see Sellestine Hunt Associate Dean of Student Services, Student Center, Room 200. At a post-secondary institution, you must self-identify as a person with a disability; Ms. Hunt will assist you with the necessary information to do so. To report any complaints of discrimination related to disability, you should contact Mr. Steve Hudman, Dean of Student Affairs, in Student Center, Room 101, (936) 633-5292 or by email [shudman@angelina.edu](mailto:shudman@angelina.edu).
2. **Attendance** – Attendance is required as per Angelina College Policy and will be recorded every class. Any student with three (3) consecutive absences or four (4) cumulative absences by November 6<sup>th</sup> may be dropped from the class. Records will be turned in to the academic dean at the end of the semester. Do not assume that non-attendance in class will always result in an instructor drop. **You must officially drop a class or risk receiving an F.** This is official Angelina College Policy.

*Note: Attendance in an internet course is based upon the student's participation and completion of assignments. You will be dropped for not completing homework assignments on MyLabsPlus and/or exams at an approved testing center.*

### 3. Additional Policies Established by the Instructor

#### MAKE-UP EXAMS

No make-up exams will be allowed. The grade on the final exam can replace any one missed test or the lowest test grade during the semester.

#### VI. COURSE OUTLINE:

A. See attachment entitled “Course Outline and Topics”

#### VII. EVALUATION AND GRADING

A. **Grading Criteria** (*percents, extra credit, weights, etc.*) –

Your numerical grade will be a weighted average based on the following:

1. **Regular Exams- 4 exams: 100 points per exam for a total of 400 points.** The material tested on each regular exam is stated on the “Course Outline and Topics” table at the end of this syllabus. Make-up exams are not given. At the end of the semester, you have the option of replacing your lowest regular exam grade with the Final Exam grade. Missing two exams will result in a “0” on one of the exams.
2. **Homework and Quizzes: 100 points total.** Homework is assigned using MyLabsPlus. MyLabsPlus must be used to complete the homework assignments.
  - a. A MyLabsPlus access code comes with a new book when purchased from the AC bookstore. The code may also be purchased with a major credit card on the website [www.angelina.mylabsplus.com](http://www.angelina.mylabsplus.com). A digital copy of the textbook is included on MyLabsPlus; therefore, a hardcopy of the textbook is not required.
  - b. Homework will have due dates and penalties for late work. Each homework assignment may be accessed until after the MLP+ due date and time.
  - c. The homework may be done on your home computer. There are limited campus sites available at the library and at the math labs in Rooms S223 and S110. These may be used on a limited space available basis.  
(No printing or surfing may be done except in the library.)
3. **Assignment to evaluate Core Objectives: 20 points total.**
4. **Final Exam: 150 points total:** The final exam covers the topics noted on the attachment “Course Outline and Topics”.
5. Note: Those who drop the course on or before September 13<sup>th</sup> will not receive a grade for the class. Those dropping between September 14<sup>th</sup> and November 6<sup>th</sup> (inclusive) will receive a W in the course. November 6<sup>th</sup> is the last day for dropping a course. Dropping a course is the student’s responsibility.

B. **Determination of Grade** (*assignment of letter grades*):

**Total possible points = 400**(regular exams) + **100**(MML homework) + **20**(assignment) + **150**(Final Exam) =  
**= 670 points**

Letter grades will be assigned according to the numerical grade scale below:

90% - 100% of the possible points = A	.90(670) = 603, earned points ≥ 603
80% - 89% of the possible points = B	.80(670) = 536 ≤ earned points < 603
70% - 79% of the possible points = C	.70(670) = 469 ≤ earned points < 536
60% - 69% of the possible points = D	.60(670) = 402 ≤ earned points < 469
Below 60% of the possible points = F.	earned points < 402

The instructor reserves the right to adjust grades upward from this scale.

**SYLLABUS MODIFICATION** – The instructor may modify the provisions of the syllabus to meet individual class needs by informing the class in advance as to the changes being made.  
**FYI**

Angelina College's campus security is available 24 hours a day by contacting 936-676-2563. Please use this number only as necessary for security issues.

Should classes for Angelina College be cancelled due to weather emergencies or other contingencies, notification will be available through local television and radio. Notification for day classes will be available by 6:00 am and for night classes by 3:00 pm. You may also call the main switchboard (936-639-1301) for information.

## Math 1324 [INTERNET] Course Outline and Topics

Fall 2017

Week	Dates	Sections	Description
1	08/28-09/03	1.2 1.6 1.7 2.1 2.2	•1.2 Polynomials •1.6 First-Degree Equations – omit Absolute-Value Eqs. •1.7 Quadratic Equations •2.1 Graphs •2.2 Equations of Lines
2	09/05-09/10	2.3 3.1 3.2 3.3	•2.3 Linear Models – include regression •3.1 Functions •3.2 Graphs of Functions •3.3 Applications of Linear Functions
<b>3</b>	<b>09/11-09/17</b>		<b>Test #1 (Sections 1.2-3.3)</b>
4	09/18-09/24	3.4 3.5 3.6	•3.4 Quadratic Functions and Applications •3.5 Polynomial Functions •3.6 Rational Functions
5	09/25-10/01	4.1 4.2 4.3 4.4	•4.1 Exponential Functions •4.2 Applications of Exponential Functions •4.3 Logarithmic Functions •4.4 Logarithmic and Exponential Equations
<b>6</b>	<b>10/02-10/08</b>		<b>Test #2 (Sections 3.4-4.4)</b>
<b>7</b>	<b>10/09-10/15</b>	5.1 5.2 5.3 5.4	•5.1 Simple Interest and Discount •5.2 Compound Interest - via algebra & TVM •Solve equations with technology - intersection method •5.3 Annuities, Future Value, and Sinking Funds - via algebra & TVM •5.4 Annuities, Present Value, Amortization - via algebra & TVM
<b>8</b>	<b>10/16-10/22</b>		<b>Test #3(Sections 5.1-5.4)</b>
9	10/23-10/29	6.1 6.2 6.3	•6.1 Systems of Two Linear Equations in Two Variables •6.2 Larger Systems of Linear Equations- via rref() •6.3 Applications of Systems of Linear Equations
10	10/30-11/05	6.4 6.5 6.6	•6.4 Basic Matrix Operations •6.5 Matrix Products and Inverses •6.6 Applications of Matrices
11	11/06-11/12	7.1 7.2 7.3	•7.1 Graphing Linear Inequalities in Two Variables •7.2 Linear Programming: Graphical Method •7.3 Applications of Linear Programming Graphing
12	11/13-11/19	7.4 7.5	•7.4 The Simplex Method: Maximization •7.5 Maximization Applications
<b>13</b>	<b>11/27-12/03</b>		<b>Test #4 (Sections 6.1-6.6 and 7.1-7.5)</b>
14	12/04-12/10	8.3 8.4 8.5 9.1	•8.3 Introduction to Probability •8.4 Basic Concepts of Probability •8.5 Conditional Probability & Independent Events •9.1 Probability Distributions and Expected Value
<b>15</b>	<b>12/07-12/13</b>	<b>Final</b>	<b>Final Exam</b>
