

**Angelina College**  
**Science and Mathematics Division**  
**BIOL 2402 Anatomy and Physiology II (BIOL 2402.002 TR)**

**I. BASIC COURSE INFORMATION**

- A. Course Description** (as stated in the bulletin, including necessary pre-requisite courses, credit hours)  
 BIOL 2402--Anatomy and Physiology II. Four hours credit. Anatomy and Physiology II is the second part of a two-course sequence. It is a study of the structure and function of the human body including the following systems: endocrine, cardiovascular, immune, lymphatic, respiratory, digestive (including nutrition), urinary (including fluid and electrolyte balance), and reproductive (including human development and genetics). Emphasis is on interrelationships among systems and regulation of physiological functions involved in maintaining homeostasis. The lab provides a hands-on learning experience for exploration of human system components and basic physiology. Three lecture and three lab hours each week. Prerequisite: TSIA Complete; Grade of C or better in BIOL 2401. Lab fee.
- B. Intended Audience**  
 This course is the second semester of the two-semester human anatomy and physiology course sequence, a continuation of BIOL 2401. It is a laboratory-based course designed for those pursuing a degree in health related careers and/or pre-professional course work (i.e. nursing, pre-medical, pre-dental, etc.).
- C. Instructor**  
 Instructor's Name: Jason Lankford  
 Office Location: S120-B  
 Office Hours: schedule posted on office door (and on Blackboard)  
 Office Phone: 936-633-5448 (please, leave a message if I do not answer)  
 E-mail Address: [jlankford@angelina.edu](mailto:jlankford@angelina.edu) (preferred method of contact)

**II. INTENDED STUDENT OUTCOMES:**

- A. Core Objectives Required for this Course**
1. **Critical Thinking:** To include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
  2. **Communication:** To include effective development, interpretation and expression of ideas through written, oral and visual communication.
  3. **Empirical and Quantitative Skills:** To include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
  4. **Teamwork:** To include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.
- B. Course Learning Outcomes for all Sections** (ACGM Lower Division Academic Course Guide Manual; <http://www.theccb.state.tx.us/reports/pdf/6309.pdf?CFID=20849286&CFTOKEN=77757605>)  
**Upon successful completion of this course, students will:**
1. **Lecture**
    - a. Use anatomical terminology to identify and describe locations of major organs of each system covered.
    - b. Explain interrelationships among molecular, cellular, tissue, and organ functions in each system.
    - c. Describe the interdependency and interactions of the systems.
    - d. Explain contributions of organs and systems to the maintenance of homeostasis.
    - e. Identify causes and effects of homeostatic imbalances.
    - f. Describe modern technology and tools used to study anatomy and physiology.
  2. **Lab**
    - a. Apply appropriate safety and ethical standards.
    - b. Locate and identify anatomical structures.
    - c. Appropriately utilize laboratory equipment, such as microscopes, dissection tools, general lab ware, physiology data acquisition systems, and virtual simulations.
    - d. Work collaboratively to perform experiments.
    - e. Demonstrate the steps involved in the scientific method.
    - f. Communicate results of scientific investigations, analyze data and formulate conclusions.
    - g. Use critical thinking and scientific problem solving skills to make decisions, recommendations, and projections.

### III. ASSESSMENT MEASURES:

#### A. Assessments for the Core Objectives

1. **Critical Thinking:** Students will identify, organize, and recall relevant information and demonstrate an in-depth understanding through completing an assignment/worksheet that is presented to them during a physiology topic. The Angelina College (AC) Critical Thinking Rubric will be used to assess each student's critical thinking skills and correctness.
2. **Communication:** Students will organize, analyze, and convey effective communication through writing a report that communicates information about a disease/disorder related to physiology. The Angelina College (AC) Communication Rubric will be used to assess each student's communication skills and correctness.
3. **Empirical & Quantitative Skills:** Students will demonstrate their abilities to represent, calculate, interpret, and analyze empirical and quantitative data by completing an assignment/worksheet. The Angelina College (AC) Empirical & Quantitative Skills Rubric will be used to assess each student's empirical and quantitative skills and correctness.
4. **Teamwork:** Students will demonstrate their abilities to communicate effectively with team members by evaluating one another after working through activities together. The Angelina College (AC) Teamwork Rubric will be used to assess each student's teamwork skills and correctness.

#### B. Assessments for Course Learning Outcomes

##### 1. Lecture

- a. Students will use anatomical terminology to identify and describe locations of major organs of each system covered by answering written questions during lecture activities, on lecture exams, and by orally answering questions during presentations and class activities.
- b. Students will explain interrelationships among molecular, cellular, tissue, and organ functions in each system by answering questions during lecture activities and on lecture exams.
- c. Students will describe the interdependency and interactions of the systems by answering written questions during lecture activities and on lecture exams.
- d. Students will explain contributions of organs and systems to the maintenance of homeostasis by answering written questions about case studies and on lecture exams.
- e. Students will identify causes and effects of homeostatic imbalances by answering embedded exam questions and by answering written questions about case studies and current advances in medicine.
- f. Students will describe modern technology and tools used to study anatomy and physiology by answering written questions about case studies or writing critical analyses of current medically related journal articles.

##### 2. Lab

- a. Students will demonstrate and apply appropriate safety and ethical standards by answering written questions during lab activities and by orally answering questions during lab activities.
- b. Students locate and identify anatomical structures by answering written questions about simulated lab activities, dissections, and by identifying anatomical structures during lab exams.
- c. Students will demonstrate the appropriate utilization of laboratory equipment such as such as microscopes, dissection tools, general lab ware, physiology data acquisition systems, and virtual simulations by answering written questions during lab activities and by orally answering questions during lab activities.
- d. Students will work collaboratively to perform experiments and demonstrate teamwork ability by working together to answer questions during teamwork activities.
- e. Students will demonstrate the steps involved in the scientific method by collecting laboratory data and performing elementary comparisons of that data, as well as, answering embedded lab exam questions.
- f. Students will communicate results of scientific investigations, analyze data and formulate conclusions by orally answering questions and writing answers to questions during lab activities.
- g. Students will demonstrate critical thinking and scientific problem solving skills to make decisions, recommendations, and projections by answering written questions about case studies.

### IV. INSTRUCTIONAL PROCEDURES: This course will be taught as a hybrid and will require computer and internet access. The course is taught using a combination of lectures and laboratory exercises that

complement and supplement lecture material. Audio-visual materials, models, and dissection of specimens will be employed to enhance lecture and laboratory presentations. Some activities will require internet access and will be completed online.

## V. COURSE REQUIREMENTS AND POLICIES:

### A. **Required Textbooks, Materials, and Equipment:**

1. Human Anatomy and Physiology by Elaine Marieb (Benjamin/Cummings), **Tenth Edition.**
2. Human Anatomy and Physiology Laboratory Manual by Elaine Marieb (Benjamin/Cummings), **Eleventh Edition.**
3. **Students will need a computer (e.g. laptop or similar device) with a CD-ROM drive and internet capabilities (e.g. wifi) for the following class requirements:**
  - a. **PHYSIOEX 9.1 Computer Simulations**, CD ROM - Packaged with textbook
  - b. Access to Blackboard ([www.angelina.blackboard.com](http://www.angelina.blackboard.com)). Obtaining a copy of the course **Lecture Notes** is highly recommended by the instructor for success in the classroom. Course lecture notes are available to print from the BIO 2402 blackboard site.
4. Students are required to supply their own scantron forms for test taking. *Both the FORM NO. 884-E scantrons (200 question) and FORM NO. 882-E scantrons (100 question)* will be used.

### B. **Course Policies – (This course conforms to the policies of Angelina College as stated in the Angelina College Handbook.)**

1. **Academic Assistance:** If you have a disability (as cited in Section 504 of the Rehabilitation Act of 1973 or Title II of the Americans with Disabilities Act of 1990) that may affect your participation in this class, you should see Maria Lopez or Steve Hudman in room 200 of the Student Center. At a postsecondary institution, you must self-identify as a person with a disability; Ms. Lopez and Mr. Hudman will assist you with the necessary information to do so. To report any complaints of discrimination related to disability, you should contact Mr. Steve Hudman, Dean of Student Affairs, in Room 101 of the Student Center. You may also contact Dean Hudman by phone at [\(936\) 633-5292](tel:9366335292) or by email [shudman@angelina.edu](mailto:shudman@angelina.edu).
2. **Attendance:** Attendance is required as per Angelina College Policy and will be recorded every day. Any student with three (3) consecutive absences or four (4) cumulative absences may be dropped from the class. Records will be turned in to the academic dean at the end of the semester. Do not assume that non-attendance in class will always result in an instructor drop. **You must officially drop a class or risk receiving an F.** This is official Angelina College Policy.

### **THE LAST DAY TO DROP WITH A “W” IS APRIL 2, 2018**

### 3. **Additional Policies Established by the Individual Instructor:**

#### **STUDENT CONDUCT**

A positive environment for learning will be maintained by students being courteous to each other and to the instructor.

- Arrive in class on time and do not prepare to leave before class is over, unless special arrangements have been made prior to class with the instructor.
- *If a student does not attend a class, it is the student's responsibility to contact the instructor for missed material or information.*
- Cell phones should be on “vibrate only” (silent mode) or turned off.
- Only one person speaks at a time. Distracting conversations during lecture will not be allowed. Respect all members of the class.
- Profanity will not be tolerated. Rude or provocative logos on clothing are not allowed in the classroom.
- Cheating on tests is not tolerated as per Angelina College policy and may result in expulsion from the course. Plagiarism is not tolerated and will result in a zero for any assignment in which it is detected. **All smart devices (phones, watches, etc.) are strictly prohibited during testing.**

## VI. COURSE CONTENT:

### Lecture content and reading assignments

<u>Day</u>	<u>Chapter</u>	<u>Topic</u>	<u>Post-Chapter Quiz Schedule</u>
01/16	Ch. 16	Endocrine System Overview.....	Complete online quiz before 3:30 pm, 01/26
01/18	Ch. 17	Blood	
01/23	Ch. 17	Blood.....	Complete online quiz before 3:30 pm, 01/26
01/25	Ch. 18	Cardiovascular System: The Heart	
01/30	Ch. 18	Cardiovascular System: The Heart..... ( <b>CA</b> : <i>Communication Assigned</i> )	Complete online quiz before 3:30 pm, 02/02
02/01	Ch. 19	Cardiovascular System: Blood Vessels	
02/06	Ch. 19	Cardiovascular System: Blood Vessels	
02/08	Ch. 19	Cardiovascular System: Blood Vessels...	Complete online quiz before 3:30 pm, 02/09
<b>02/13</b>	<b>EXAM I (Chapters 17-19)</b>		
02/15	Ch. 20	Lymphatic System.....	Complete online quiz before 3:30 pm, 02/16
02/20	Ch. 21	Immune System: Body Defenses	
02/22	Ch. 21	Immune System: Body Defenses	
02/27	Ch. 21	Immune System: Body Defenses..... ( <b>CA</b> : <i>Communication Due</i> )	Complete online quiz before 3:30 pm, 03/02
<b>03/01</b>	<b>EXAM II (Chapters 20-21)</b>		
03/06	Ch. 22	The Respiratory System	
03/08	Ch. 22	The Respiratory System	
	<i>Spring Break (03/12-03/16)</i>		
03/20	Ch. 22	The Respiratory System.....	Complete online quiz before 3:30 pm, 03/23
03/22	Ch. 23	Digestive System	
03/27	Ch. 23	Digestive System	
03/29	Ch. 23	Digestive System.....	Complete online quiz before 3:30 pm, 03/30
04/03	Ch. 24	Nutrition, Metabolism	
04/05	Ch. 24	Nutrition, Metabolism.....	Complete online quiz before 3:30 pm, 04/06
<b>04/10</b>	<b>EXAM III (Chapters 22-24)</b>		
04/12	Ch. 25	Urinary system	
04/17	Ch. 25	Urinary system	
04/19	Ch. 25	Urinary system.....	Complete online quiz before 3:30 pm, 04/20
04/24	Ch. 26	Fluid, Electrolyte, Acid-Base Balance	
04/26	Ch. 26	Fluid, Electrolyte, Acid-Base Balance.....	Complete online quiz before 3:30 pm, 04/27
05/01	Review		
<b>05/03</b>	<b>EXAM IV (Chapters 25 and 26)</b>		
<b>05/08</b>	<b><u>FINAL EXAM (Comprehensive); Tuesday, 11:00 am - 1:00 pm</u></b>		

See the Final Exam Schedule for the exact time: <http://www.angelina.edu/final-exam-schedule/>

## VII. EVALUATION AND GRADING:

### A. **Grading Criteria** (*percents, extra credit, etc.*)

Questions for lecture exams and quizzes will be taken from lecture notes and textbook chapters. *It is important for the student to understand that not all of the textbook information will be discussed in class, thus it is the students responsibility to read and study all chapter material (besides lecture notes) in preparation for an exam.* Combined scores from lecture and laboratory constitute the final grade in the course:

#### Lecture

4 Lecture Exams = 100 points each

Lecture Quizzes/Homework/

Core Assessments = 100 points total (quizzes are averaged to reach this total)\*

Lecture Comprehensive Final = 100 points

$$600 \div 6 = 100 \text{ points}$$

#### Lab

4 Lab Exams = 100 points each

Lab Quizzes/Homework/

Core Assessments = 100 points total (quizzes are averaged to reach this total)\*

Lab Comprehensive Final = 100 points

$$600 \div 6 = 100 \text{ points}$$

Course average will be determined according to the following:

Lecture Average (60%)  $100 \times .60 = 60$

Lab Average (40%)  $100 \times .40 = \underline{40}$

100

### B. **Determination of Grade** (*assignment of letter grades*)

Grades for the course will be based on the following guidelines:

A = 90 - 100 points

B = 80 - 89 points

C = 70 - 79 points

D = 60 - 69 points

F = 59 points

- C. **Lecture Exams:** There will be four lecture exams (worth a total of 100 points each) that will be given as shown on the class schedule. Exams include multiple-choice questions. The final exam is worth 100 points and will be 100% comprehensive. The grade on the lecture comprehensive final exam can replace the single lowest grade on the regular lecture exams. **NO make-up exams will be given for any reason. If you miss a lecture exam, the LECTURE FINAL EXAM grade will replace the grade of that missed exam.**
- D. **Quizzes/Homework:** A series of quizzes will be given during lecture and lab. Lecture and lab quizzes will cover material from the previous week's lesson. At least **one** lowest lecture and lab quiz grade for the semester will be dropped. \*The average of these quizzes/homework will count as another exam grade. **THERE WILL BE NO MAKE-UPS FOR MISSED QUIZZES WHETHER ONLINE OR IN CLASS.**
- E. **Assessments:** An assessment measuring communication will be given during lecture, and assessments measuring critical thinking, empirical and quantitative, and teamwork will be given during lab. Each assignment is required, and will be counted as quiz/homework grades toward the correlating portions of the course.
- Due dates:**
- Communication (lecture): February 27, 2018
  - Critical Thinking (lab): see lab syllabus
  - Empirical & Quantitative Skills (lab): see lab syllabus
  - Teamwork (lab): see lab syllabus

## VIII. SYLLABUS MODIFICATION:

The instructor may modify the provisions of the syllabus to meet individual class needs by informing the class in advance as to the changes being made.
