

## I. BASIC COURSE INFORMATION

- A. Course Description** - Calculus I - Math 2413. Four semester-hours credit. Limits and continuity; the Fundamental Theorem of Calculus; definition of the derivative of a function and techniques of differentiation; applications of the derivative to maximizing or minimizing a function; the chain rule, mean value theorem, and rate of change problems; curve sketching; definite and indefinite integration of algebraic, trigonometric, and transcendental functions, with an application to calculation of areas. Prerequisite: Math 2412 Pre-Calculus Math or equivalent preparation.
- B. Intended Audience**  
Science, Mathematics and Engineering Majors.
- C. Instructor**  
Instructor's Name: George Reed  
Office Location: S203-C  
Phone: (936) 633-5485  
E-mail: [greed@angelina.edu](mailto:greed@angelina.edu)  
Office Hours:  
MW 1:30 – 3:00  
TR 1:30 – 3:00  
Friday by appointment

## II. INTENDED STUDENT OUTCOMES

- A. Core Objectives Required for this Course**
- 1. Critical Thinking:** to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
  - 2. Communication:** to include effective development, interpretation and expression of ideas through written, oral, and visual communication.
  - 3. Empirical and Quantitative Skills:** to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
- B. Course Learning Outcomes for all Sections**  
**Upon successful completion of this course, students will:**
1. Develop solutions for tangent and area problems using the concepts of limits, derivatives, and integrals.
  2. Draw graphs of algebraic and transcendental functions considering limits, continuity, and differentiability at a point.
  3. Determine whether a function is continuous and/or differentiable at a point using limits.
  4. Use differentiation rules to differentiate algebraic and transcendental functions.
  5. Identify appropriate calculus concepts and techniques to provide mathematical models of real-world situations and determine solutions to applied problems.
  6. Evaluate definite integrals using the Fundamental Theorem of Calculus.
  7. Articulate the relationship between derivatives and integrals using the Fundamental Theorem of Calculus.

## III. Assessment Measures

- A. Assessments for the Core Objectives**
- 1. Critical Thinking:** Students will complete an out-of-class worksheet. A rubric will be used to assess critical thinking skills and correctness of the project.
  - 2. Communication:** Students will make a classroom presentation of a calculus problem and will complete an out-of-class worksheet. A rubric will be used to assess oral and visual communication skills during the classroom presentation, and a rubric will be used to assess written communication skills on the worksheet.
  - 3. Empirical and Quantitative Skills:** Students will complete an out-of-class worksheet. A rubric will be used to assess empirical and quantitative skills and correctness of the worksheet.
- B. Assessments for Course Learning Outcomes**
1. The students ability to develop solutions for tangent and area problems using the concepts of limits, derivatives, and integrals will be assessed through embedded test questions.
  2. The students ability to draw graphs of algebraic and transcendental functions considering limits, continuity, and differentiability at a point will be assessed through embedded test questions.
  3. The students ability to determine whether a function is continuous and/or differentiable at a point using limits will be assessed through embedded test questions.

4. The students ability to use differentiation rules to differentiate algebraic and transcendental functions will be assessed through embedded test questions..
5. The students ability to identify appropriate calculus concepts and techniques to provide mathematical models of real-world situations and determine solutions to applied problems will be assessed through an out-of-class worksheet.
6. The students ability to evaluate definite integrals using the Fundamental Theorem of Calculus will be assessed through embedded test questions.
7. The students ability to articulate the relationship between derivatives and integrals using the Fundamental Theorem of Calculus will be assessed through an out-of-class worksheet.

#### IV. **INSTRUCTIONAL PROCEDURES**

This course will be taught using a combination of lectures, discussions, and practice exercises. The amount of time spent using any one technique will vary from class to class and from lesson to lesson as determined to be most appropriate by the instructor. The graphing calculator will be utilized as appropriate in classroom demonstrations.

#### V. **COURSE REQUIREMENTS AND POLICIES**

##### A. **Required Textbooks, Materials and Equipment**

1. Text(s) and supplementary materials  
Calculus, by James Stewart (Cengage), Eighth Edition.
2. Specific equipment required of all students  
A TI (Texas Instruments) graphing calculator is required or highly recommended. The TI-84 graphing calculator will be used by the instructor in all classroom demonstrations.

##### B. **Assignments**

1. Specific assignments required for all students (term papers, homework, speeches, participation in community activities, etc.)  
See the attached: **Course Content and Topics**
2. Appropriate due dates, schedules, deadlines, etc. as determined by the individual instructor  
See the attached **Math 2413 Assignments**.

##### C. **Course Policies - This course conforms to the policies of Angelina College as stated in the Angelina College Handbook.**

1. **Educational Accommodations** – If you have a disability (as cited in Section 504 of the Rehabilitation Act of 1973 or Title II of the Americans with Disabilities Act of 1990) that may affect your participation in this class, you may fill out the Educational Accommodations application within your AC Portal, under the “Student Services” tab. A Student Success team member will contact you once the application is received. At a post-secondary institution, you must self-identify as a person with a disability in order to receive services; for questions regarding the application process you can visit the Office of Student Success and Inclusion in the Student Center (Room 200) or email [access@angelina.edu](mailto:access@angelina.edu). To report any complaints related to accommodations, you should contact Annie Allen, Director of Student Success & Inclusion, in Room 200 of the Student Center. You may also contact Ms. Allen by calling (936) 633-4509 or by emailing [aallen@anglina.edu](mailto:aallen@anglina.edu). To report discrimination of any type, contact Steve Hudman, Dean of Student Affairs, at (936) 633-5292 or [shudman@angelina.edu](mailto:shudman@angelina.edu).
2. **Attendance** - Attendance is required as per Angelina College Policy and will be recorded every day. Any student with three (3) consecutive absences or four (4) cumulative absences may be dropped from the class. Records will be turned in to the Registrar’s Office at the end of the semester. Do not assume that non-attendance in class will always result in an instructor drop. **You must officially drop a class or risk receiving an F.** This is official Angelina College Policy.
3. **Additional Policies Established by the Instructor**
  1. Cell phones are to be out of sight and silent or vibrate unless otherwise instructed. If a student has a special responsibility, answer the call out in the hallway and choose to return to class or deal with the responsibility.
  2. E-mails received after 4:00 on Friday will be responded to by Monday morning.
  3. A positive learning environment will be maintained by students and instructors treating each other with courtesy.
  4. Daily quizzes and in-class work cannot be made up.

**VI. COURSE OUTLINE: Description of the Course Activities including due dates, schedules, and deadlines.**

See attached: COURSE CONTENT AND TOPICS, and MATH 2413 - ASSIGNMENTS

**VII. EVALUATION AND GRADING**

**A. Grading Criteria (percents, extra credit, etc.)**

1. Four major exams: 100 points each  
Comprehensive final exam: 100 points  
Total Points: 500
2. Those who drop the course on or before January 30<sup>th</sup> will not receive a grade for the class. Those dropping between January 31<sup>st</sup> and April 1<sup>st</sup> (inclusive) will receive a W in the course. April 1<sup>st</sup> is the last day for dropping a course. Dropping is your responsibility.
3. Make-up exams will be allowed only in unusual circumstances. Inform me before the exam and we will schedule a make-up. Otherwise, the grade on the final exam can replace any one missed test or the lowest test grade during the semester.

**B. Determination of Grade (assignments of letter grades)**

Grades will be assigned according to the scale below.

- 90 - 100% = A (448 points – 500 points)
- 80 - 89% = B (398 points – 447 points)
- 70 - 79% = C (348 points – 397 points)
- 60 - 69% = D (298 points – 347 points)
- Below 60% = F (below 298 points)

The instructor reserves the right to adjust grades upward from this scale.

The instructor may modify the provisions of the syllabus to meet individual class needs by informing the class in advance as to the changes being made.

**Course Content and Topics  
Mathematics 2413, Calculus I**

<u>Lesson</u>	<u>Section</u>	<u>Description</u>
1	1.4	The Tangent and Velocity Problems
2	1.5	The Limit of a Function
3	1.6	Calculating Limits Using the Limit Laws
4	1.8	Continuity
<b>5</b>		<b>Test 1 (Sections 1.4 - 1.8, omit 1.7)</b>
6	2.1 2.2	The Derivative The Derivative as a Function
7	2.3	Differentiation Formulas
8	2.4	Derivatives of Trigonometric Functions
9	2.5 2.6	The Chain Rule Implicit Differentiation
10	2.7	Rates of Change in the Natural and Social Sciences
11	2.8	Related Rates
12	2.9	Linear Approximations and the Differential
<b>13</b>		<b>Text 2 (Sections 2.1 - 2.9)</b>
14	3.1	Maximum and Minimum Values
15	3.2 3.3	The Mean Value Theorem How Derivatives Affect the Shape of a Graph
16	3.4	Limits at Infinity: Horizontal Asymptotes
17	3.5 3.6	Summary of Curve Sketching Graphing with Calculus and Calculators
18	3.7	Optimization Problems
<b>19</b>		<b>Test 3 (Sections 3.1 - 3.7)</b>
20	3.9	Antiderivatives
21	4.1	Areas and Distances
22	4.2	The Definite Integral
23	4.3	The Fundamental Theorem of Calculus
24	4.4	Indefinite Integrals and the Net Change Theorem
25	4.5	The Substitution Rule
<b>26</b>		<b>Test 4 (Sections 3.9 - 4.5)</b>
27	6.2 6.4	Exponential functions and Their Derivatives Derivatives of Logarithmic Functions
28	6.6 6.8	Inverse Trigonometric Functions Indeterminate Forms and L'Hospital's Rule
29		Wrap-up Topics
30		Review for Final Exam
<b>31</b>		<b>Comprehensive Final Exam</b>
